What is a 48V 50Ah lithium ion battery kit?

This 48V 50AH Lithium Ion Battery Kit is plug and play for starting or deep cycle applications including Marine, RV, Golf, Solar, Off Grid, Propulsion and other applications requiring a lightweight lithium battery to replace Lead Acid, Gel or AGM Batteries.

What is a 48V 40A battery charger?

A 48V 40A battery charger is an input single 110 / 230Vac rated output voltage of 48V 40A smart charger. Its smart max charging voltage is 58.8V for SLA, AGM, and GEL batteries.

Is a 12ah lithium battery better than a 48AH battery?

Thus a 12Ah lithium battery would perform closer to a 48Ah lead-acid battery rating for higher discharge currents and life performance. Ionic's lithium-ion batteries have 1/3 the internal resistance of a similar capacity lead-acid battery and they can be safely discharged to 90% DOD.

What is a lithium ion battery?

A. Lithium-ion batteries are rechargeable batteries in which lithium ions move from the anode to the cathode during discharging and back when charging. They are popular batteries for use in consumer electronics because they provide high energy density, possess no memory effect and have a slow loss of charge when not in use.

Will a 12ah lithium battery damage a lead-acid battery?

Going below 50% DOD will damage a lead-acid battery, even if they claim to be a deep discharge battery. Thus a 12Ah lithium battery would perform closer to a 48Ah lead-acid battery rating for higher discharge currents and life performance.
