A new solar panel factory in Ireland

BMS Wiring Diagram

Overview

Voltalia has been selected by Ørsted to provide engineering, procurement and construction for its first solar power plant in Ireland, located in County Carlow, in the east of the country. What is the largest solar farm in Ireland?

Here are just three projects of note. As of January 2025, the largest solar farm currently under construction in Ireland is the Clonfad Solar Farm, located in County Westmeath. Developed by Statkraft, this substantial project boasts a capacity of 175 megawatts (MW).

Will Orsted build a second Irish solar farm?

Orsted has been awarded contracts for, or is developing, solar projects that will generate 700MW in all. TJ Hunter, who is Orsted's vice-president of onshore in the UK and Ireland, said he was delighted that construction of the firm's second Irish solar farm had started.

What's going on with a solar farm in Ireland?

The company has started work at its first solar farm in Ireland, the 81MW Garreenleen project in Co Carlow. Completion is expected next year. In March, the firm announced it had signed a landowner lease agreement with Cork-based Greenhills farm, one of Ireland's largest dairy farmers, with the goal of using the site for renewable energy generation.

Can a solar farm be built in Cork?

A similar solar energy farm to the one being built by Orsted in Ballinrea, Cork. Photograph: Alan Betson Renewable energy company Orsted has started to build a 55-megawatt (MW) solar farm just outside Cork city, with the project expected to generate enough electricity for 16,000 homes.

Does Voltalia have a solar project in Ireland?

Voltalia contracted with Ireland-based independent power producer (IPP) Power Capital Renewable Energy to build, operate and maintain four solar

power projects located in southeast Ireland with a combined capacity of 230 MW.
