Angola Bobo City Communication Base Station Inverter

Overview

How many data centers are there in Angola?

Angola has only five reliable data centers sustained by legislative framework for data security and protection. Companies must establish alternative sources of power and deal with slow internet speeds, expensive data, and scarce fiber network. Flagship Projects.

Are fiber optic cables coming to Angola?

About 70 percent of Angolans live close to the sea. Other planned fiber optic cables to Angola include SAex and ACE. Along with benefits gained by process of digital transformation, threats arise to end-users, including the government and private organizations.

Why is cybersecurity a top priority in Angola's digital transformation process?

The Government of Angola identified cybersecurity as a top priority segment on the digital transformation process. With digital transition in the government administration due to continuous threats and attacks, many projects and programs will be launched to stimulate data use, replication, and protection.
