Are solar panel prices low now

Overview

Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024.

Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024.

According to an EnergySage report, the median quoted price of solar decreased for the third year in a row, hitting its lowest in recorded data at \$2.50 per watt.

Solar prices stay low, battery costs rose modestly. Solar prices stayed at their record-low median of \$2.48 per watt in the first half of 2025, unchanged from H2 2024. Installers absorbed.

This dramatic price drop means a typical home solar installation now costs about 65% less than it did a decade ago. To put this in perspective, a homeowner who waited until 2023 to install solar panels would save over \$30,000 compared to making the same purchase in 2013.

Residential solar prices are falling lower than ever before, said marketplace operator EnergySage in its biannual solar and storage marketplace report. The median quoted price on its platform reached \$2.50 per watt in the second half of 2024, falling 6.4% from the first half of 2024.

Are solar panel prices low now

A study by the Department of Energy's Lawrence Berkeley Laboratory found homes with solar panels sold for an average cost of around \$15,000 more than comparable homes ...

As a general trend, we expect U.S. solar prices to continue falling as local manufacturing plants come online. However, with the threat of new tariffs beginning in 2025 ...

Use this solar panel calculator to quickly estimate your solar potential and savings by address. Estimates are based on your roof, electricity bill, and actual offers in your area.

For homeowners thinking about installing solar panels, there's good news in a recent market report from the experts at EnergySage.
