

## **PDEOZE PowerContainer**

# **Are there any energy storage projects in Slovenia**

## Overview

---

Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by 2035, including 590MW of pumped hydro energy storage (PHES) and 150MW of battery energy storage (BESS). What are the major developments in the renewables sector in Slovenia?

The main developments in the renewables sector include the introduction of the National Energy and Climate Plan and the adoption of secondary legislation, aiming to make Slovenia a climate-neutral society in the coming decades and motivating private finance to invest in projects including renewable sources.

Does Slovenia have gas storage facilities?

Slovenia does not have gas storage facilities, and is dependent on infrastructure in Austria and Croatia. Slovenia has expressed interest in securing U.S. LNG sources via terminals in Krk, Croatia, or Rovigo, Italy, to diversify its supply. Beginning in 2027, Geoplin booked additional capacity to acquire LNG from the Krk terminal.

What is Slovenia's energy industry like?

Slovenia's energy companies are active in developing innovative electricity transmission and distribution solutions, while the country's energy infrastructure is among the strongest in the region. Ministry of the Environment, Climate, and Energy Langusova 4, SI- 1000 Ljubljana, Slovenia.

What is Slovenia's energy capacity?

The reference capacity in the related scenario is 1.1 GW, from a range of 1 GW to 2.4 GW. A small modular reactor (SMR), of 250 MW, would come online by mid-century, the NECP reads. Slovenia plans to maintain a high level of electricity connectivity with neighboring countries, with a goal of more than 80%.

How many hydropower plants will Slovenia have by 2045?

Another pumped storage hydropower plant is seen by 2045. It would be able to generate 180 MW and store 2.6 GWh. The Integrated National Energy and Climate Plan envisages an overall 500 MW in gas power plants in Slovenia by the end of the decade.

What are the main sources of electricity in Slovenia?

A paid subscription is required for full access. Nuclear power is the most used source of electricity production in Slovenia. In 2022, nuclear power plants accounted for 42 percent of total electricity generation. Coal-fired and hydropower plants followed, each making up approximately 24 percent of power production that year.

Sep 3, 2024 · HSE is targeting 800MW of flexibility assets across Slovenia by 2035, including pumped hydro energy storage and BESS technology.

Dec 27, 2024 · Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

There are no major electricity storage projects in Slovenia with the exception of the hydroelectric pumped storage facility Avce (which has a capacity of 185 MW) on the Soca River, which is ...

Feb 3, 2023 · The Kozjak pumped hydropower project in Slovenia consists of a 440 MW plant and a 400 kV transmission line, CEO of state-owned utility DEM Damjan Seme said. The company ...

Oct 16, 2021 · Slovenia's Energy Storage Playbook: Projects That Don't Suck The "Hydrogen Valley" Experiment an industrial zone where factories run on hydrogen made from excess ...

June 15, 2023: The European Commission said on June 9 it had approved a EUR150 million (\$163 million) state-aid scheme to develop battery storage and renewables in Slovenia. This follows ...

Mar 10, 2024 · This effort complements Slovenia's renewable energy expansion targets of 1,400 MW of solar and 70 MW of wind capacity, increasing grid flexibility and energy security. The ...

The European Commission (EC) on Friday approved, under EU state aid rules, a EUR-150-million (USD 161m) scheme in Slovenia that aims to support the expansion of renewable energy, heat ...

Feb 3, 2023 · The Kozjak pumped hydropower project in Slovenia consists of a 440 MW plant and a 400 kV transmission line, CEO of state-owned utility DEM Damjan Seme said. The company is also working on a project for ...

Information about Energy Storage in Slovenia When exploring the Energy Storage industry in Slovenia, several key considerations emerge. Regulatory frameworks play a crucial role; ...

Apr 24, 2018 · There are no major electricity storage projects in Slovenia with the exception of the hydroelectric pumped storage facility Avce (which has a capacity of 185 MW) on the Soca ...

Dec 27, 2024 · Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

June 15, 2023: The European Commission said on June 9 it had approved a EUR150 million (\$163 million) state-aid scheme to develop battery storage and renewables in Slovenia. This follows a spate of recent approvals for EU ...

Sep 3, 2024 · HSE is targeting 800MW of flexibility assets across Slovenia by 2035, including pumped hydro energy storage and BESS technology.
