

PDEOZE PowerContainer

Austrian outdoor wind power base station manufacturer

Overview

Back in the 1980s, there were huge private wind measurements and experiments with smaller plants. In 1994, initiated by Councilor Waltner, 110 (kW) was set up in . Another wind turbine was put into operation six months later in . In 1995, the first wind turbine was built with civic participation in . In January 1996, the first turbine of the type E-40 with 500 kW was placed in . Not.

Who makes the most wind power in Austria?

Regarding market development, the Austrian market was dominated by Vestas, which was responsible for 54% of the added capacity. The second biggest wind power manufacturer was Enercon with a share of 45%.

How much wind energy does Austria produce in 2021?

To read more about Austria's wind energy sector in 2021, read their chapter in the 2022 Annual Report. Total wind power capacity is 3,560 MW. Wind power capacity in Austria increased by 315 MW in 2022. Austria produces 8.2 TWh from wind energy, which accounts for 11.1% of the country's electricity consumption.

What are the hidden costs of wind power in Austria?

The hidden costs of wind power in Austria are currently not quantified. Most of the property owners are farmers. They have an additional source of income by leasing their land to the wind park operator. The prices paid for property leases for wind turbines are many times more than would normally be earned by farming the property.

How much does wind research cost in Austria?

In the last twelve years, according to surveys by the Austrian Energy Agency, the average amount of wind research funding from the public sector was 1.15 million euros per year; in the last two years the funding average has doubled (2.3 million euros).

Why has Austrian wind power increased by 315 MW?

Austrian wind power increased by 315 MW. Many of the projects are still part of a queue caused by inadequate support scheme conditions in recent years and lengthy approvals. Since winter 2022 the new support scheme EAG (Erneuerbaren-Ausbau-Gesetz) is in place. The first wind power plant subsidized by this scheme will be erected earliest next year.
