BESS energy storage project in the UK

Overview

In early February, the 100 MW/ 331 MWh project in Bramley, England, developed by BW ESS and supplied with Sungrow's PowerTitan 2.0 liquid cooled battery energy storage system (BESS), officially went into commercial operation. How big is a Bess project in the UK?

This is projected to increase to 7.4GW by the end of the year. What about planned projects?

Renewable UK's Energy Storage Report (Dec 2023) states that the total pipeline of battery projects increased from 50.3 gigawatts (GW) a year ago to 84.8GW, an increase of 68.6%. The number of BESS projects are growing, and so too is the size of the project.

What is a Bess project?

The landmark project, which secured the first long-term tolling agreement for a single battery energy storage system (BESS) asset in Great Britain last year, has now set a record for speedy commissioning.

What's happening with the growth of Bess in the UK?

We look at what's happening with the growth of BESS in the UK. According to Solar Media Market Research the energy storage market is experiencing substantial growth, with the total operational capacity for projects in the UK now at 4.6GW. This is projected to increase to 7.4GW by the end of the year. What about planned projects?

.

Which UK battery energy storage systems have won government approval?

Three new UK battery energy storage systems (BESS) and a 150 MW capacity solar farm have won government approval. The Scottish government has given Kona Energy the green light for the construction and operation of the Smeaton battery energy storage system (BESS), a 228 MW/456 MWh project

near Dalkeith, East Lothian.

What are Bess technologies?

detailed assessment was then conducted for BESS technologies, with a particular focus on lithium-ion, sodium-ion, metal-air and vanadium flow batteries. By comparing BESS technologies with the current UK energy policy and legislation, potential gaps were identified that require attention to support the scaled implementation of flexible capa.

Are battery energy storage systems a growing part of the energy mix?

Battery energy storage systems (“BESS”) projects are a growing part of the energy mix. This article considers recent developments in the sector. The UK market is the focus of this assessment, but the trends seen in the UK should also be seen in the context of a wider global rollout of the technology, some of which is assessed here.

Battery energy storage systems ("BESS") projects are a growing part of the energy mix. This article considers recent developments in the sector. The UK market is the focus of

this assessment, but the trends seen in the UK should also be seen in the context of a wider global rollout of the technology, some of which is assessed here.

Aug 23, 2024 · This is where the crucial role of battery energy storage systems (BESS) come into play, storing and releasing energy for when it's needed most. We look at what's happening with the growth of BESS in ...

Sep 3, 2025 · The UK had one of its best months for large-scale BESS projects entering commercial operations in August, new data shows.

Nov 26, 2024 · Battery energy storage systems ("BESS") projects are a growing part of the energy mix. This article considers recent developments in the sector. The UK market is the focus of this assessment, but the trends ...

Jul 1, 2024 · Construction has commenced on a massive battery energy storage system (BESS) project at Cellarhead in the West Midlands, with 54 BESS containers installed in only 38 days.

As of June 2023, there are 161 operational BESS sites in the UK of varying sizes with a combined electricity storage capacity of 2.6GWh (enough to power around 5 million homes for an hour).

Feb 20, 2025 · However, within the UK, numerous sites over 1GWh in size have already been approved and construction has begun on some of these sites that will ultimately become some of the largest BESS projects in ...

Feb 20, 2025 · However, within the UK, numerous sites over 1GWh in size have already been approved and construction has begun on some of these sites that will ultimately become some ...

Mar 12, 2025 · In early February, the 100 MW/ 331 MWh project in Bramley, England,

developed by BW ESS and supplied with Sungrow's PowerTitan 2.0 liquid cooled battery energy storage ...

Apr 17, 2025 · There will be a potential surge in battery energy storage system (BESS) projects receiving grid connection offers before 2030 following regulatory reforms approved by energy ...

Jul 1, 2024 · Construction has commenced on a massive battery energy storage system (BESS) project at Cellarhead in the West Midlands, with 54 BESS containers installed in only 38 days.

Apr 17, 2025 · There will be a potential surge in battery energy storage system (BESS) projects receiving grid connection offers before 2030 following regulatory reforms approved by energy regulator Ofgem, ...

Nov 9, 2024 · The Scottish government has given Kona Energy the green light for the construction and operation of the Smeaton battery energy storage system (BESS), a 228 MW/456 MWh project near Dalkeith, East ...
