Balkan Energy Storage Cabinet Cooperation Model

Overview

How will the western Balkan six improve energy security and sustainability?

By focusing on renewable energy and energy efficiency, the Western Balkan Six will enhance their energy security and sustainability while taking significant steps towards a greener and more equitable future. Currently, the Secretariat is evaluating the draft integrated national energy and climate plans submitted during the summer months.

Does the Western Balkans need a new energy sector?

Little success has been achieved on either modernising the region's energy sector or cutting emissions. By and large, Western Balkan countries remain dependent on coal. At present, lignite accounts for about 70% of the electricity produced in the region. In Kosovo, Serbia and Bosnia and Herzegovina the.

What is the energy support package for the Western Balkans?

At the Berlin Process Summit on November 3, 2022, the European Commission announced a €1 billion Energy Support Package for the Western Balkans to address the region's immediate and longer-term energy needs amid the 2022/23 energy crisis.

Is the EU promoting a green energy transition in the Western Balkans?

The final brief of BiEPAG's Geopolitics of the Green Energy Transition¹ project explores the EU's role in promoting the energy transition in the Western Balkans. Despite the EU's commitment to climate action and extensive financial assistance, the region's progress in adopting renewable energy sources remains slow.

How does foreign influence influence the energy transition in Western Balkan countries?

Cooperation between foreign investors and local elites allows foreign influence

to persist in the energy sectors of Western Balkan countries, shaping the geopolitical dynamics of the green energy transition.

How much does the Western Balkans spend on energy?

According to available Household Budget Survey figures, the median household in the Western Balkan countries spends between 7 and 10 percent of their total budget on energy. The World Bank provided comments/recommendations on targeted support programs for energy vulnerable customers (EVC) in Kosovo, North Macedonia and Serbia.
