Bhutan Mobile Power Generation Company

Overview

Why is Bhutan partnering with a power company?

This also marks the largest partnership between two of the leading power companies of the two nations in Asia's clean energy sector and is expected to help unleash Bhutan's potential for hydropower and its important role in ensuring energy security in the region.

Does Tata Power have a clean power line in Bhutan?

Tata Power also has a 1,200-km Tala transmission line that evacuates clean power from Bhutan to India. (Mint) New Delhi: Tata Power Company Ltd has entered into a strategic partnership with Druk Green Power Corporation Ltd (DGPC) to develop at least 5,000 MW of clean energy generation capacity in Bhutan.

Why is Tata Power Building a power plant in Bhutan?

The development is in line with Bhutan's vision for its energy sector, which is to raise its overall power generation capacity to 25,000 MW by 2040, from 2,300 MW currently, for its energy security and regional energy integration, Tata Power said. Tata Power also has a 1,200-km Tala transmission line that evacuates clean power from Bhutan to India.

Why is Bhutan partnering with Tata Power?

"This is in keeping with Bhutan's vision for its energy sector which is to take its overall generation capacity to 25,000 MW by 2040 for its energy security and regional energy integration," Tata Power said on the collaboration.

How much power does Bhutan have?

"This is a proud moment for us, and I am confident that together we will turn this vision into reality." Bhutan is richly endowed with renewable hydropower resources, with an estimated potential of 36,900 MW and an annual production capacity of 154,000 gigawatt hours (GWh).

How will Bhutan's government diversify its power mix?

The financing will back the construction of small to mid-size run-of-river hydropower plants and solar photovoltaic generation to help the Bhutanese government diversify the country's power mix.
