Burkina Faso s new energy storage plans

Overview

The government of Burkina Faso recently reached a public-private partnership with the Dutch company Gutami Holdings to jointly develop and construct a 150 megawatt solar photovoltaic power generation project, and to build a 50 megawatt hour battery energy storage system.

The government of Burkina Faso recently reached a public-private partnership with the Dutch company Gutami Holdings to jointly develop and construct a 150 megawatt solar photovoltaic power generation project, and to build a 50 megawatt hour battery energy storage system.

Dutch developer Gutami Holding has signed a 25-year power purchase agreement with Burkina Faso's national utility to supply electricity from a planned 150 MW solar project paired with 50 MWh of storage. The government of Burkina Faso has formalized a public-private partnership with.

The project is earmarked to deliver 150MWp of solar PV power integrated with a 50MW battery energy storage system (BESS) The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar.

The government of Burkina Faso recently reached a public-private partnership with the Dutch company Gutami Holdings to jointly develop and construct a 150 megawatt solar photovoltaic power generation project, and to build a 50 megawatt hour battery energy storage system. The project has obtained.

Well, here's something you might not know: Ouagadougou's peak electricity demand currently sits at 250 MW, but the city's aging grid can only reliably supply 180 MW [1]. This 70 MW deficit isn't just about occasional blackouts - it's holding back economic growth in a region where 65% of businesses.

That's exactly what the Ouagadougou Linyang Energy Storage initiative brings to Burkina Faso's energy landscape. As of 2025, this \$180 million project stores enough electricity to power 200,000 homes during peak demand, addressing what locals jokingly call "the 5pm scramble" when businesses and.

International bidders have again been requested to submit prequalification documents for Burkina Faso's 75MWp/75MWh Konéan and 45MWp/45MWh Kouritenga solar-storage projects, both backed by the World Bank and Clean Technology Fund. Want to read more?
