Cambodia is leaping its track in transition to clean energy, with solar farms set to double their electricity this year to the national grid. A report from the Electricity Authority of Cambodia (EAC) showed that solar farms are set to generate approximately 720MW of electricity this year to the.

CAMENERGY (A Part of CAMBUILD 2025) - Cambodia's No.1 International Power Systems, Renewable Energy, Solar Technologies & Energy Engineering Show is back to power the Kingdom's energy and solar advancements. Taking place at the Diamond Island Convention and Exhibition Centre (DICEC) in Koh Pich.

According to TrendForce, Cambodia is accelerating the development of clean energy to reduce its reliance on imported energy, enhance the country's energy security, ensure reliable and affordable power supply, and help this Southeast Asian nation achieve its goal of having at least 70% clean energy.

Cambodia — In past decades, the family of Heur Sophy, 44, made their living with the flow of the seasons in the northern riverlands of landlocked Stung Treng province. During the rainy months in the Sesan district village of Kamphun, her father and grandfather would farm the rice fields. In the dry.
