Are you planning to travel abroad, relocate or vacation to Africa in the near future?

If you're from North America, you should be aware that the electrical system there operates at a different voltage and you'll need to be properly prepared before embarking on your trip. In Africa, the standard.

DOACE offers a range of power converters that not only adapt the plug but also regulate voltage. This is how you can safely use your 110V hairdryer, curling iron, or other small appliances when traveling abroad. While big cities like Cape Town, Nairobi, and Lagos have reliable internet access.

There are 15 types of outlets worldwide, and a power adapter is a small but necessary investment that will support you in all future travels for years to come. You don't want to risk fried electronics, damaged devices, or a blown fuse! Use this quick guide to learn the basics of international.

That's just an extension cord, right?

Then it depends on what you plan to plug on it. Most chargers and lower-power items now accept 100-240V. But things like hairdryers, curling irons,

etc. are typically tied to a single voltage. You need to check the items you need to bring. If 100-240V, then a.

To save you the trouble of having to browse through each country in Africa, we list all power plugs and outlets used throughout the continent in a single overview. Simply click on a country for more information on that specific country. Check if you need any power plug adapter or converter when.

Are you preparing to travel outside of the USA or Canada and want to take items that require electricity?

First, do a little homework to make sure you power up—instead of blow up—your devices. The power supply (voltage and frequency) and the types of power outlets differ between countries. There is. Can you plug a device into an African outlet?

Not only do plug types differ, but so does voltage. While North America uses 110-120V, most African countries run on 220-240V. If your devices aren't dual voltage, plugging them directly into an African outlet could cause serious So, if you're bringing devices from the US, you need to check if they support dual voltage.

Do you need a plug adapter in Africa?

Africa is a massive continent with over 50 countries. Unfortunately, there's no universal plug standard. Depending on where you're traveling, you might need different plug adapters. Here's a general breakdown of what to expect: - West Africa (Nigeria, Ghana, Senegal, Ivory Coast, etc.) - Type D and G plugs are standard.

Do I need a power strip for Africa?

However, we recommend carrying a power strip with surge protection. This allows you to charge multiple items quickly when power is available. Before heading to Africa, double-check what power solutions you need based on your itinerary. A well-packed travel kit should include:.

What type of plug do you use in Africa?

Some places also use Type C or Type G. That way, whether you're in Rwanda or Ghana, you'll have the right fit. Here's where things get tricky. Not only do plug types differ, but so does voltage. While North America uses 110-120V, most African countries run on 220-240V.

What type of power outlet is used in Israel?

Used exclusively in Israel Power outlet type H is unique to Israel, it has two flat prongs – similarly to plug B – however they form a V shape rather than being parallel, they also include an earth pin, in the 80's the holes of the plugs were made round in order to accommodate type C plugs as well.

Which charger plug should I use for international travel?

We use and recommend the Universal World Wide Travel Charger Adapter Plug which works worldwide (except in South Africa as explained below). While it doesn't act as a converter for your power supply, it's a great value and offers a relatively compact option for those of you looking for an easy solution for international travel.
