Central Asia Base Station Communication Products

Overview

What is a base station?

A base station comprises a baseband unit (BBU) and a remote radio unit (RRU), and Murata's lineup of products for use in the distribution unit (DU) and central unit (CU) of baseband units is introduced here.

What is a communication base station?

Communication base stations are an essential element in providing a stable communication environment for mobile communication devices such as mobile phones and smartphones. The installation of 5G base stations and compact base stations (small cells) in areas where signals are congested is presently proceeding apace.

What is a 5G base station & a compact base station?

The installation of 5G base stations and compact base stations (small cells) in areas where signals are congested is presently proceeding apace. Murata offers products that support high-speed, high-capacity communication, such as compact, low-loss capacitors and inductors, and high-frequency filters.
