China-Africa new outdoor power supply

Overview

A photovoltaic power station built by a Chinese company generates clean, stable energy for residents of a village in Gambella National Regional State, Ethiopia. [Photo/Xinhua]How can China and the European Union support Africa's energy transition?

Addressing Africa's energy challenges and accelerating its transition to a low-carbon, climate-resilient economy are crucial for global climate action. As Africa's key trading and investment partners, China and the European Union can play an important role in supporting the continent's energy transition.

Does China provide green energy to Africa?

The perspective is shared by Yang Baorong, a researcher at the China-Africa Institute, who said that China provides Africa with high-quality and affordable green energy technologies and products, making them accessible to more African people.

What role does China play in Africa's energy transition?

As Africa's key trading and investment partners, China and the European Union can play an important role in supporting the continent's energy transition. Since the early 21st century, both China and the EU have built upon their existing ties with Africa to establish and strengthen new forms of cooperation with energy as a critical area of focus.

How much money will China spend on solar power in Africa?

The ongoing Africa Solar Belt program, for example, underscores this commitment, with China pledging at least 100 million yuan (about \$14 million) in public funds from 2024 to 2027 to power 50,000 households in Africa with off-grid solar systems.

Why are Africa's energy partnerships important?

Rhoda Wachira, head of the energy unit in the Africa office of the United

Nations Environment Program, said these partnerships are vital as they enable African countries to access advanced technologies and financial support from China, which is crucial for a successful energy transition.

Is China a good partner for Africa?

"China is a reliable partner for Africa in its pursuit of high-quality green energy," Yang said. "Africa and China can jointly overcome the challenges of climate change and move toward a cleaner, more sustainable and prosperous future." Africa is home to the largest number of developing countries.
