

PDEOZE PowerContainer

Colombia s new solar power generation product for home use

1mwh (500kw/1mw)

AIR COOLING
ENERGY STORAGE CONTAINER

Overview

Established under Decree 0972 of 2025, the “Colombia Solar” program shifts support for strata 1–3 households from recurring state subsidies to self-supply through solar panel installations.

Established under Decree 0972 of 2025, the “Colombia Solar” program shifts support for strata 1–3 households from recurring state subsidies to self-supply through solar panel installations.

The firm’s newest solar modules, ranging from 460 watts to 665 watts, have passed the strict RETIE test in Colombia. The result opens a fast-growing market to the company and boosts local green goals. [What Is RETIE and Why Does It Matter?](#)

RETIE stands for Reglamento Técnico de Instalaciones.

Colombia has recently unveiled a series of ambitious measures to accelerate its adoption of renewable energy and enhance energy efficiency. Focusing on the expansion of distributed energy generation and upgrades to grid infrastructure, these initiatives are set to significantly bolster the.

Colombia will equip more than 1 million low-income households with solar systems to replace subsidies, cut bills and add capacity to the grid. From pv magazine LatAm The Colombian government has launched a new program to help low-income households deploy PV systems. The Colombia solar scheme aims.

A new solar power initiative in Colombia is projected to help low-income households reduce electricity expenses by 20–40%. Established under Decree 0972 of 2025, the “Colombia Solar” program shifts support for strata 1–3 households from recurring state subsidies to self-supply through solar panel.

Colombian solar installation company Erco Energia has secured COP 18 billion (USD 4.60m/EUR 3.97m) in financing from Banco de Bogota to build distributed generation (DG) solar plants in Colombia’s department of Tolima, law firm Cuatrecasas said on Wednesday. The portfolio consists of six projects.

Enel Colombia has launched La Loma Solar Park, which has a capacity of 150 MWac, making it the largest solar energy project in the country. This initiative reaffirms the company's commitment to enhancing the energy matrix and advancing toward a future powered by clean and renewable energy. "Our.
