East Timor Home Solar All-in-One

Overview

Will East Timor's first solar power plant be built in 2026?

During his nine years as a Reuters correspondent, he has attempted to lend a global perspective to small-town issues. East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair told Reuters, helping it slash expensive diesel imports.

Is East Timor interested in solar power?

East Timor President José Ramos-Horta told The Associated Press in an interview in Dili last week that his country is interested in exploring various types of renewable energy sources, including wind, sea and especially solar power. "We have plenty of sun," he said, adding that the cost of solar technology continues to fall.

Will East Timor retire its diesel power plants?

East Timor plans to retire its diesel power plants in the "near-to-medium term," Ferreira said, adding that the country hopes to switch to natural gas-fired power plants and consider further renewable investments to further cut power costs.

Can East Timor transition its energy sector?

A man sells electricity credit at a shop in Dili, East Timor Sunday, Sept. 8, 2024. (AP Photo/Firdia Lisnawati) Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants.

Where in East Timor can you find solar lights?
