# **Energy storage battery assembly in Vietnam**

## Overview

---

Fluence, the joint venture between Siemens and AES Corporation, and Korean-based ACE Engineering have opened a new, automated battery energy storage production facility in Bac Giang Province, Vietnam.

Fluence, the joint venture between Siemens and AES Corporation, and Korean-based ACE Engineering have opened a new, automated battery energy storage production facility in Bac Giang Province, Vietnam.

Global energy storage technology and energy software services provider Fluence and ACE Engineering have opened a new automated battery storage manufacturing facility in Vietnam's Bac Giang Province. The facility, which boasts an annual manufacturing capacity of 35GWh, will produce Fluence's.

Fluence, the joint venture between Siemens and AES Corporation, and Korean-based ACE Engineering have opened a new, automated battery energy storage production facility in Bac Giang Province, Vietnam. The site is designed to manufacture Fluence's energy storage solutions, including Gridstack Pro.

The original PDP8 approved in 2023 had set out a target of 300MW of BESS capacity by 2030. The revised PDP 8 (approved by the Prime Minister via Decision No. 768/QD-TTg) now targets between 10,000 MW and 16,300 MW of BESS capacity by 2030. This increase reflects Vietnam's commitment to integrating.

Marubeni Corporation, through its wholly-owned subsidiary Marubeni Green Power Vietnam Co., Ltd, has commenced a battery energy storage system ("the BESS") demonstration project in the Socialist Republic of Vietnam (hereinafter, "Vietnam"). This project (hereinafter, "the Project") is based on a.

Vietnam has set targets of 10,000–16,300 MW of battery storage by 2030 under its revised power plan, while formalizing BESS in law and working on tariffs, licensing, and incentives to scale from pilot projects to commercial deployment. Vietnam is accelerating efforts to develop a large-scale.

A consortium of five international and Vietnamese companies has proposed investing in an energy storage battery plant in the Ho Chi Minh City-based Saigon High-Tech Park (SHTP), with total investment capital of \$850 million. The DCH consortium includes Dai Dung Corporation, Construction Corporation.

## Energy storage battery assembly in Vietnam

---

At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power.
