What is a lithium-ion battery storage cabinet?

DENIOS presents its Energy Storage Cabinet specifically crafted for Lithium-ion batteries, ensuring secure containment and charging. These meticulously designed lithium-ion battery storage containers guarantee comprehensive safeguarding, including 90-minute fire resistance against external sources.

Where can I find the perfect lithium-ion battery storage container?

Let the team at Denios help you find the perfect lithium-ion battery storage container. Our website offers state-of-the-art lithium-ion cabinets with fireproof battery storage, providing peace of mind and protection for your energy storage needs.

Can a defective battery be stored outside?

Spatial separation by storing the defective batteries outdoors is only possible if a safety distance of 10 m surrounds the site. In addition, you must consider the manufacturer's instructions for energy storage cabinets.

Which lithium-ion charging cabinets should I Choose?

Asecos provides two reliable lithium-ion charging cabinets to fit your specific needs. Both options offer exceptional fire protection and safety features, ensuring secure storage and battery charging. This guide will help you choose the right cabinet size for your space and capacity requirements.

Are lithium battery storage cabinets fireproof?

Constructed from powder-coated sheet steel, they incorporate a tested, liquid-tight spill sump to manage battery leaks that may catch fire. These fireproof lithium battery storage cabinets also feature self-closing doors and high-quality oil-damped door closers, further enhancing safety measures.

Can a battery be stored outside?

According to insurers and associations, batteries of medium capacity must spatially or structurally (in a fire-resistant manner) be separated from other areas. Spatial separation by storing the defective batteries outdoors is only possible if a safety distance of 10 m surrounds the site.
