Spain's Official State Gazette (BOE) includes September announcements of eight storage projects – five of them identified as batteries. Six of the projects would have a total scale of 227.5 MW and the other two would have a storage capacity of more than 247 MWh. Five of the eight 'storage' project.

Spain has taken a decisive step in strengthening its energy infrastructure with the launch of a €700 million support scheme aimed at expanding large-scale energy storage across the country. This initiative, coordinated by the Ministry for the Ecological Transition and the Demographic Challenge.

The European Commission has approved a €699 million (US\$760 million) state aid scheme in Spain to support the deployment of up to 3.5GW of energy storage. The scheme was approved this week (17 March) under the EU's Temporary Crisis and Transition Framework (TCTF), its programme to help economies in.

Spain authorizes more than 3,400 MW in energy storage, marking a rebound after the blackout and consolidating solar and battery hybridization. Energy storage has experienced an unprecedented boost in Spain during the third quarter of 2025. According to data from the Renewable Energy Observatory.

Energy storage projects in Spain by 2025

Spain's Ministry for the Ecological Transition and the Demographic Challenge (MITECO) has announced a major funding initiative worth EUR700 million to boost large-scale ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities ...

What future does energy storage hold in Spain? Projects, regulations, and the key role after the nuclear shutdown.

Spain authorizes more than 3,400 MW in energy storage, marking a rebound after the blackout and consolidating solar and battery hybridization. Energy storage has ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal ...

It will be part-financed by the European Regional Development Fund (ERDF). It will take the form of direct grants covering no more than 85% of a project's capital expenditure, and is open to all ...
