Flywheel energy storage frequency regulation upper and lower limits

Overview

The upper limit and lower limit of SOC F (t) of the flywheel energy storage system are set as 30 % and 90 %, respectively. The over-release warning zone is defined as $0.2 < \text{SOC F (t)} < 0.3$; the overcharge alert zone is $0.7 < \text{SOC F (t)} < 0.85$.
