

PDEOZE PowerContainer

French containerized solar energy storage project bidding

Overview

Developers can submit bids for the first round between Sept. 22 and Oct. 2, 2025. Five additional rounds are planned for 2026. The first round will allocate 192 MW, marking a sharp drop from previous expansion levels. How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

What is TagEnergy doing in France?

"TagEnergy is proud to announce this flagship project in France, just weeks after connecting the first phase of the Southern Hemisphere's largest wind farm in Australia and the UK's largest transmission-connected battery", said Franck Woitiez, CEO of TagEnergy.

How will the Cernay Bess contribute to France's energy sovereignty?

"Leveraging an innovative financing structure and deploying storage at scale, the Cernay BESS will contribute significantly to France's energy sovereignty while enhancing grid stability as renewable energy penetration grows" he added.
