

## **PDEOZE PowerContainer**

**Germany's dedicated energy storage battery company**

## Overview

---

Where is Germany's largest battery storage facility?

Bollingstedt / Kirchheim near Munich, 5 June 2024. Germany's largest battery storage facility is now online and has been officially inaugurated. Since April, a 103.5 MW / 238 MWh storage system has been operating in Bollingstedt, Schleswig-Holstein, contributing significantly to the urgently needed energy transition.

How is a battery energy storage system (BESS) reimagining a business model?

It is in some ways replicating the business model it has used in the UK, Italy, Australia and Sweden so far—entering equity investment and joint development agreements with local development partners to embark on large-scale battery energy storage system (BESS) projects in strategic locations.

Where are lithium ion batteries stored?

Strategically located on approximately 1.2 hectares near Bollingstedt in wind-rich northern Germany and in close proximity to a substation, the facility comprises 64 containers housing lithium-ion batteries and 32 containers for inverters and transformers.

Is Germany's electricity mix different to the UK?

Terralayr CEO Philipp Mann also said that the German electricity mix “is a bit different” to that of the UK, with less reliance on offshore wind, for example.
