The Global Cybersecurity Outlook 2025 highlights key trends shaping economies and societies in 2025, along with insights into emerging threats and solutions.

Flywheel Energy Storage Systems (FESS) offer a mature solution for enhancing stability, frequency control and voltage regulation in electrical systems, leveraging kinetic energy stored in a rotating mass.

With the completion of this project, China is expected to inspire the development of more flywheel storage systems worldwide, providing an efficient and eco-friendly solution to ...

Enter flywheel energy storage systems (FESS), the silent workhorse that's been quietly revolutionizing how we store power. From stabilizing New York City's subway system to ...

This year's edition of the Global Gender Gap Report arrives at a decisive moment, with the world in flux. Technological breakthroughs, geopolitical conflict and economic ...

The global market for Flywheel Energy Storage Equipment was valued at US\$ 95 million in the year 2024 and is projected to reach a revised size of US\$ 411 million by 2031, growing at a ...

Beacon Power is building the world's largest flywheel energy storage system in Stephentown, New York. The 20-megawatt system marks a milestone in flywheel energy storage technology, as similar systems have only been ...

The Global Gender Gap Index was first introduced by the World Economic Forum in 2006 to benchmark progress towards gender parity across four dimensions: economic ...

Chapter 2, to profile the top manufacturers of Flywheel Energy Storage Equipment, with price, sales quantity, revenue, and global market share of Flywheel Energy Storage Equipment from ...

The flywheel energy storage market size crossed USD 1.3 billion in 2024 and is expected to register at a CAGR of 4.2% from 2025 to 2034, driven by rising demand for reliable UPS systems in data centers.

The Global Risks Report 2025 analyses global risks to support decision-makers in balancing current crises and longer-term priorities.

China has developed a massive 30-megawatt (MW) FESS in Shanxi province called the Dinglun flywheel energy storage power station. This station is now connected to the ...

The Global Gender Gap Index annually benchmarks the current state and evolution of gender parity across four key dimensions (subindexes): Economic Participation and ...

The flywheel energy storage market size crossed USD 1.3 billion in 2024 and is expected to register at a CAGR of 4.2% from 2025 to 2034, driven by rising demand for reliable UPS ...

Beacon Power is building the world's largest flywheel energy storage system in Stephentown, New York. The 20-megawatt system marks a milestone in flywheel energy ...

The result of an international collaboration involving more than 100 experts spanning the public and private sectors, this report provides tools, frameworks and ...

With the completion of this project, China is expected to inspire the development of more flywheel storage systems worldwide, providing an efficient and eco-friendly solution to the growing need for energy storage.
