

## **PDEOZE PowerContainer**

# **Home time-sharing energy storage system**

## Overview

---

In a time-sharing model for residential BESS, multiple households share the use of a single battery system. Each household pays a fraction of the total cost and uses the system during designated time slots.

## Home time-sharing energy storage system

---

Welcome to the world of energy storage sharing, where your batteries become community assets and your electricity bills get a reality check. Think of your energy storage ...

What Does Community Storage Mean? Where and How Is Community Storage Being used? Could A Community Storage Device Be Shared by Customers? The Future of Community Storage In states that have enabled shared solar programs, the majority of programs utilize electricity bill credits to distribute to customers the benefits of participation in a shared solar facility. Participation models vary, but generally speaking, customers may buy or lease a portion of the facility, or subscribe to a portion of the facility's generation.
