Honduras develops energy storage project

Honduras develops energy storage project

Honduras announces a tender for the installation of an energy storage system with batteries (BESS) at the Amaratéca substation, aiming to improve electrical supply stability.

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year after evaluation and award phases are completed, Carbajal said. The Amaratéca substation ...
