How many 5G base stations are there in Vietnam

Overview

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

Does Vietnam have a 5G network?

The Military Industry and Telecommunications Group (Viettel) officially commercializes the 5G network | Source: VnEconomy. The Vietnamese government is upgrading digital infrastructure by deploying new international undersea fiber optic cables and developing data centers by 2025.

Will 5G be commercialized in Vietnam?

According to the Ministry of Information and Communications, 4G coverage in Vietnam is currently 99.8%, higher than even developed countries with high incomes with only 99.4%. This is a step forward for 5G to be commercialized in Vietnam just a few months ago in October. Source: Vatvostudio.

How many base stations does Viettel Mobile have?

With over 6,500 base stations, Viettel's 5G service now covers all 63 provinces, including industrial parks, tourist areas, seaports, airports, hospitals, and universities. This launch coincides with the 20th anniversary of Viettel Mobile, marking a significant milestone in Vietnam's mobile evolution.

How many 5G transmission stations will Viettel install in 2024?

Viettel plans to install over 3,000 transmission stations to ensure comprehensive 5G coverage nationwide by the end of 2024. In Vietnam, projections indicate that 5G technology could contribute approximately 7.34% to GDP growth by 2025, significantly enhancing productivity across various industries.

What is 3G & how does it work in Vietnam?

3G, or the third generation of mobile communications, revolutionized connectivity in Vietnam when it was officially launched in 2009. Enabled by major telecom operators like Viettel, Mobifone, and Vinaphone, enabled users to transmit voice and data, including emails, images, and videos, transforming their interaction with technology.
