How much does a 58-watt solar panel cost

Overview

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or.

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or.

A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit. NOTE: Under the "One Big Beautiful Bill Act" signed in July 2025, the federal solar.

You'll pay an average of \$13,884 to install a 5 kilowatt (kW) solar panel system in New York before any available incentives. Solar panels typically last 25-30 years, generating free electricity and protecting you from rising utility rates for decades. Compare multiple offers and save up to 20% Why.

The cost of solar panels in New York reflects this sunny opportunity, ranging between \$13,300 and \$21,000 for the average system. While it may cost more to install solar panel systems in New York than other states, local tax incentives, financing programs and unique net metering options can balance.

As of 2025, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which.

In New York, the average cost of a solar panel system ranges from around \$30,000 to \$50,000 before tax credits. The cost-per-watt in New York averages around \$3.20, and is a valuable metric for comparing system sizes and types. What determines solar panel cost?

Our in-house design team will.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers. How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much do solar panels cost in New York?

As of January 2025, the average solar panel system costs \$2.92/W including installation in New York. For a 5 kW installation, this comes out to about \$14,608 before incentives, though prices range from \$12,417 to \$16,799. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

How much does a 5 kilowatt solar system cost in New York?

You'll pay an average of \$14,608 to install a 5 kilowatt solar panel system in New York, before incentives. The federal investment tax credit (ITC) lowers that price by 30% of all your solar equipment and installation costs. Why trust

EnergySage?

As subject matter experts, we provide only objective information.

How accurate is solar cost per watt?

The most accurate pricing metric is still cost per watt, but per-sq-ft estimates are helpful for ballpark figures. In California, electricity rates are among the highest in the nation, making solar ROI faster than average — see average electric bill in California.
