An implementation agreement is in place between Serbia's Ministry of Mining and Energy, utility company Elektroprivreda Srbije (EPS) and a consortium of Hyundai Engineering and UGT Renewables for six new solar plants totalling 1 GW. Up to 200 MW of battery storage will be developed across the.

Now there are plans in place for UGT Renewables and Hyundai Engineering to provide a series of self-balanced utility-scale solar projects bringing reliable, renewable energy to every corner of Serbia. Delivering the utmost flexibility to the Serbian government, the Large-Scale Solar and Battery.

The Government of Serbia has signed an agreement with the Hyundai Engineering-UGT Renewables consortium on building solar power plants with a total connection capacity of 1,000 MW (1,200 MW in nameplate capacity), along with battery systems for electricity storage of up to 200 MW/400 MWh. The.

Serbia has taken a bold step toward renewable energy with a newly signed agreement to build 1 GW of self-balancing solar power plants. This groundbreaking project, led by the Hyundai Engineering and UGT Renewables consortium, marks a significant shift in Serbia's energy strategy. Serbia aims to.

State-owned power utility Elektroprivreda Srbije (EPS) has issued a tender for professional supervision and consulting services for the development of self-balancing solar power plants. The contract is valued at approximately 5.5

million euros, with the deadline for applications set for 5 May. The.

e developed across the sites. Image: Ministry of Mining and Energy, Tanjug  
Plans for 1 GW of new solar in Serbia are set to go ahead after the signing o  
lement the energy transition. Coal-fired power plants would be closed by  
2050, but not before there is enough green p Wh of battery energy storage.
