

PDEOZE PowerContainer

Huawei high-power mobile energy storage power supply vehicle

Overview

What is Huawei digital power?

Huawei Digital Power is committed to integrating digital and power electronics technologies, developing clean power, and enabling energy digitalization to drive energy revolution for a better, greener future. In the clean power generation sector, we help create new power systems that primarily rely on renewable energy.

What does Huawei do?

Huawei is a global leader in digital power and ICT solutions, driving innovation, sustainability, and intelligent transformation across industries with cutting-edge technology and expertise.

Why is Huawei developing a solid-state battery?

Huawei's design aims to boost safety and cycle life by mitigating degradation at this critical junction. Huawei's involvement in solid-state battery research reflects a broader trend among Chinese technology and automotive companies. While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials.

Does Huawei make power batteries?

While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials. Earlier in 2025, the company filed a separate patent on the synthesis of sulfide electrolytes — a key material known for its high conductivity but also high cost, sometimes exceeding the price of gold.

What is a Huawei-made charging station?

Image of a Huawei-made charging station. Huawei China's Huawei has officially launched the world's first 100 MW-class supercharging facility for electric trucks, demonstrating a new era of high-power, ultra-fast charging

technology.

What is Huawei supercharging hub?

The new Sichuan supercharging hub, powered by Huawei's Megawatt Supercharging technology, is designed to support the next generation of ultra-fast-charging heavy-duty trucks. The facility is compatible with "3.5C" supercharging models, allowing drivers to add about 62 miles of range in just five minutes of charging.
