

## PDEOZE PowerContainer

# India s containerized energy storage capacity

## Overview

---

India's cumulative installed energy storage capacity reached 490 megawatt-hours (MWh) as of the end of June 2025, according to a report released by Mercom India on Wednesday.

India's cumulative installed energy storage capacity reached 490 megawatt-hours (MWh) as of the end of June 2025, according to a report released by Mercom India on Wednesday.

India installed over 341 MWh of battery energy storage systems (BESS) in 2024, marking an over sixfold increase from the 51 MWh installed in 2023, according to Mercom India Research's newly released report India's Energy Storage Landscape. With these additions, India's total installed battery.

India's cumulative installed energy storage capacity reached 490 megawatt-hours (MWh) as of the end of June 2025, according to a report released by Mercom India on Wednesday. The report, which presented findings on India's energy storage landscape, stated that in the first half of 2025.

India is rapidly increasing hybrid (renewable energy + battery storage) tenders to increase the share of renewables in total power generation. With a rise in preference for firm renewable energy, the share of hybrid tendered capacity has increased from about 12% in 2021 to over 49% in 2024 in the.

India's Climate and Energy Dashboard does not accept any liability for any consequences resulting from the use of this data. <https://iced.niti.gov.in>  
242.63 GW Total Installed RE capacity + Hydro(As on Aug'25) Average Thermal PLFs 68.54% (FY 25) 65.74% (Apr'25-Aug'25)(Excluding oil & gas-based.

Guided by our National Electricity Plan and bold climate pledges, we aim to achieve 500 GW of renewable energy capacity by 2030—a goal that reflects our resolve to lead globally in clean energy. Energy storage is at the core of this vision. It's the key to harnessing the full potential of renewable.

India has set a target to achieve 50% cumulative installed capacity from non-

fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by 45% by 2030, based on 2005 levels. The incorporation of a significant amount of variable and intermittent Renewable.

## India s containerized energy storage capacity

---

Policy measures such as viability gap funding (VGF), energy storage obligations, and increased budget allocations for pumped storage projects (PSPs) have supported this growth. ...

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219MWh of BESS ...

SBICAPS said in a new report that India will add 30 GW of energy storage capacity - including battery and pumped storage - through standalone and FDRE projects by June 2027.

Energy Statistics India 2025 Download NMDS 2.0 Cover Page Foreword Officers Associated with Publications Abbreviations and Acronyms Table of Contents List of Tables ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, ...

India's cumulative installed energy storage capacity reached 490 megawatt-hours (MWh) as of the end of June 2025, according to a report released by Mercom India on ...

SBICAPS said in a new report that India will add 30 GW of energy storage capacity - including battery and pumped storage - through standalone and FDRE projects by June 2027.

This report highlights the current state, challenges, and prospects of Energy Storage Systems in India's renewable energy landscape, providing insights and recommendations for stakeholders.

Policy measures such as viability gap funding (VGF), energy storage obligations, and increased budget allocations for pumped storage projects (PSPs) have supported this growth. India has also added 4.7 GW ...

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ...

Ushering in the 10M Era for Single Container Systems. This new offering is a true industry first: an integrated single-container system boasting an unprecedented storage ...

A one-stop data platform with information across India's climate, energy, economy and environment contours.
