# India s new fluid energy storage project

## Overview

---

India has launched its first variable speed pumped storage plant at Tehri, Uttarakhand. Learn how this 1,000 MW hydro project boosts grid stability and renewable energy storage.

India has launched its first variable speed pumped storage plant at Tehri, Uttarakhand. Learn how this 1,000 MW hydro project boosts grid stability and renewable energy storage.

A 1,000 MW hydropower project designed to store energy by pumping water to an upper reservoir using surplus power, and releasing it to generate electricity when demand rises. How the Tehri PSP Works?

**Pumping Phase:** Surplus renewable energy (e.g., from solar or wind) is used to pump water from lower.

New Delhi/Mumbai, 02 July 2025 – To further strengthen India’s renewable energy infrastructure, IFC and IndiGrid [BSE: 540565|NSE: INDIGRID] have partnered to develop a 180 MW/360 MWh standalone battery energy storage system project in Gujarat. The project is designed to play a key role in.

India is rapidly scaling up its pumped storage hydropower infrastructure, targeting over 51 GW capacity by 2032—a more than tenfold increase. Spearheading this energy transformation are major private developers Greenko, Adani Green, and JSW Energy, who will collectively manage nearly two-thirds.

India's plans to widen the renewable energy (RE) basket with new energy forms like Pumped Storage Hydro Projects (PSHP) have gained significant traction as 38 projects with 50,670 MW capacity have been lined up for commissioning by 2032. The Central Electricity Authority (CEA) envisaged a.

Project includes four 250 megawatts hydropower variable speed pumped storage units, allowing short response times to load changes, giving the network greater flexibility. GE Vernova Inc. (NYSE: GEV) announced today that it has commissioned the first of four 250 megawatts (MW) variable speed

units.

## India s new fluid energy storage project

---

India's plans to widen the renewable energy (RE) basket with new energy forms like Pumped Storage Hydro Projects (PHP) have gained significant traction as 38 projects with 50,670 MW capacity have been ...

India is rapidly scaling up its pumped storage hydropower infrastructure, targeting over 51 GW capacity by 2032--a more than tenfold increase. Spearheading this energy ...

New Delhi: India's energy storage sector is set to grow by over 12 times to 60 GW by FY32, driven by a massive increase in variable renewable energy (VRE) and the need to maintain grid stability, according ...

India is making significant strides in advancing hydro pumped storage projects (PSPs), with a robust framework of incentives, regulatory streamlining, and digital monitoring ...

India is rapidly scaling up its pumped storage hydropower infrastructure, targeting over 51 GW capacity by 2032--a more than tenfold increase. Spearheading this energy transformation are major private ...

NEW DELHI , 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) ...

GE Vernova Inc. (NYSE: GEV) announced today that it has commissioned the first of four 250 megawatts (MW) variable speed units at THDC India Limited's Tehri Pumped ...

In light of India's larger ambitions to meet a growing portion of its energy requirements

from RE sources, storage investments become critical to ensure reliability and ...

NEW DELHI , 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) project, the largest of its kind in South Asia.

New Delhi: India's energy storage sector is set to grow by over 12 times to 60 GW by FY32, driven by a massive increase in variable renewable energy (VRE) and the need to ...

India's plans to widen the renewable energy (RE) basket with new energy forms like Pumped Storage Hydro Projects (PHP) have gained significant traction as 38 projects with ...

With IFC's support, we are proud to lead the deployment of one of India's first and largest BESS assets in Gujarat. This project represents a strategic milestone in building next-generation infrastructure that is clean, ...

Three players--Greenko, Adani Green, and JSW Energy--are set to develop nearly two-thirds of India's planned 51 gigawatt (GW) pumped storage hydropower capacity by 2032, according to new ...

Three players--Greenko, Adani Green, and JSW Energy--are set to develop nearly two-thirds of India's planned 51 gigawatt (GW) pumped storage hydropower capacity by ...
