

## PDEOZE PowerContainer

# Indonesia pack battery factory

✓ TELECOM CABINET

✓ BRAND NEW ORIGINAL

✓ HIGH-EFFICIENCY

## Overview

---

Where is Indonesia's first EV battery factory located?

Indonesia, renowned for its vast nickel reserves, has inaugurated Southeast Asia's first EV battery manufacturing plant in Karawang, West Java. HLI Green Power, a joint venture between Indonesia Battery Corporation, Hyundai Motor and LG Energy Solution, owns this state-of-the-art facility.

Will CATL build a battery factory in Indonesia?

CATL has laid the foundation stone for a battery cell factory in Indonesia in collaboration with its joint venture partner, Indonesia Battery Corporation. The factory in Karawang in West Java is scheduled to go into operation by the end of 2026 with an initial capacity of 6.9 gigawatt hours (GWh), and will later be expanded to 15 GWh.

Does Hyundai have a battery plant in Indonesia?

The battery plant integrates with Hyundai's auto factory, which plans to produce 50,000 units of the Kona Electric SUV per year using Indonesian-made batteries. Hyundai and LG Energy Solution are preparing for the second phase of the battery plant, which involves an additional US\$2bn investment to increase capacity by another 20 GWh.

How is Indonesia developing a battery plant?

The government in Jakarta is developing these raw material deposits in conjunction with adjacent inland industrial processes, such as nickel processing, cathode materials, battery production and vehicle plants. In 2024, Hyundai and LGES commissioned a battery cell factory in Indonesia. Hyundai opened a vehicle plant in Indonesia in 2022.

Will Rept battero invest in a new battery production facility in Indonesia?

Hong Kong-listed REPT Battero has announced plans to invest in a new battery production facility in Indonesia. The company board approved the investment

on Jan. 10, with operations to be handled by its Indonesian subsidiary.

Why is Indonesia launching its first EV battery plant?

The launch of the country's first battery plant on Wednesday is part of Indonesia's push to move up the global EV supply chain. Indonesia has the world's largest reserves of nickel, a crucial component in EV batteries and steelmaking.
