Voltage Rise Wires have resistance causing Voltage Drop. All grid-tied inverters increase voltage to export power. Typically they only need to raise the voltage above the grid ...

This is caused by a high intermediate circuit DC voltage. This can arise from high inertia loads decelerating too quickly, the motor turns into a generator and increases the inverter's DC voltage.

Best Solar Inverters of 2025 If you want to go solar, you need a good inverter. Here are the best solar inverters to turn power captured by your panels into energy.
