Ireland Energy Storage Vehicle Price Comparison

Overview

How much do electric cars cost in Ireland?

Electric cars in Ireland cost on average between €20,000 to €50,000 depending on the size and make of the car. There are several SEAI grants available to help with the purchase of electric cars worth up to €3,500. Electric cars produce zero carbon emissions and can be charged at home, or at public charging points.

How much does an EV cost in Ireland?

EVs in Ireland cost €0.18 per kilometre to run, while diesel comes in at €0.27 and petrol at €0.30 per kilometre. That's up to 60% lower running costs for electric cars. Charging an EV costs a lot less than refueling a petrol or diesel car. A 60 kWh battery costs about €12 for a full charge. Filling up a traditional car?

Expect €50-€100.

How much does it cost to own a car in Ireland?

The average cost to own a car in Ireland is €10,373 a year. Electric vehicles often have lower running costs, even if the purchase price is higher. Most of the savings come from cheaper fuel and less maintenance. Electric cars don't need oil changes, spark plugs, or a lot of engine-related fixes.

How many kilometres can an electric car go in Ireland?

A few electric cars in Ireland can go more than 400 kilometres on a single charge. Premium models from BMW, Mercedes-Benz, and Audi lead the pack, though they're pricey. The BMW iX and Mercedes EQS top the range charts through Irish dealers.

Can electric vehicles save you money in Ireland?

"Electric vehicle tax benefits in Ireland can save drivers £500-800 annually

when you factor in motor tax, fuel duty exemptions, and company car BIK rates,” says Ciaran Connolly, Lead Reviewer at Amazing Cars and Drives. Electric vehicles don’t produce any direct emissions while driving.

Are used electric cars worth resale in Ireland?

Ireland’s used electric car market is hot, but there just aren’t enough cars to go around. The Nissan Leaf totally dominates second-hand EV sales, with older models selling for €12,000 to €18,000. Battery life worries hit resale values hard. Older EVs with short ranges don’t keep their value like newer ones with better batteries.
