What is Ireland's Electricity demand & generation capacity statement?

This statement outlines the expected electricity demand and the level of generation capacity that will be required on the island of Ireland over the next ten years to maintain security of electricity supply and support social and economic growth.

Is the Irish power generation market receptive to US technology?

The \$2.6 billion Irish market for electrical power generation equipment is very receptive to U.S. technology. In the face of strong international competition, U.S. companies have achieved success in supplying technology, equipment, and systems to Irish power generation operators.

How efficient is Ireland's Electricity Supply?

The efficiency of Ireland's electricity supply has generally improved over the last decades, due to the introduction of higher efficiency natural gas plants,

the closure of older peat-fired stations, and increased direct generation from renewable sources.

Who approves the generation capacity statement in Northern Ireland?

This Generation Capacity Statement has been approved by the Utility Regulator in Northern Ireland, in accordance with the SONI licence requirement. What is the GCS?

1.1 Why do we have a GCS?

What is the GCS?

The Generation Capacity Statement (GCS) is an annual report from EirGrid.

How much energy do data centers need in Ireland?

In 2021, over 1,700 MVA of demand capacity is contracted to the 70 data centers and other large energy users based in Ireland. Demand from data centers and other new large energy users is forecast to account for 28% of all energy demand by 2031.

Does Ireland have a separate electricity market?

The electricity sector in Ireland previously operated as two separate markets: Northern Ireland operated as part of the UK, and the Republic of Ireland operated its own separate market.

The graph shows the trends in primary energy supply for electricity generation broken-

out by fuel type and energy source. Note that non-combustible renewable sources accounted for a higher ...

The Ireland energy market data since 1990 and up to 2024 is included in the Excel file accompanying the Ireland country report. It showcases the historical evolution, allowing users to easily work with the data.

The \$2.6 billion Irish market for electrical power generation equipment is very receptive to U.S. technology. In the face of strong international competition, U.S. companies have achieved ...

For Ireland, since 2016, EirGrid has warned via the GCS of an increasing tightness between supply and demand. There is no question that the current outlook, based on the best ...

Due to the substantial photovoltaic capacity, in order to ensure full PV grid integration (minimizing the wastage of solar power generation), the client is seeking an energy ...

Our latest reports include an in-depth analysis of the impact of the war in Ukraine, the consequent geopolitical uncertainty and implications for gas, carbon and power markets.

Power Generation in Ireland industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2017-22, and forecast to 2027).

Due to the substantial photovoltaic capacity, in order to ensure full PV grid integration (minimizing the wastage of solar power generation), the client is seeking an energy storage solution.

The \$2.6 billion Irish market for electrical power generation equipment is very receptive to U.S. technology. In the face of strong international competition, U.S. companies ...

This market has created "a gross mandatory pool market, into which all electricity generated on or imported onto the island of Ireland must be sold, and from which all wholesale electricity for ...

Our analysts track relevant industries related to the Ireland Power Generation Market, allowing our clients with actionable intelligence and reliable forecasts tailored to emerging regional needs.

The Ireland energy market data since 1990 and up to 2024 is included in the Excel file accompanying the Ireland country report. It showcases the historical evolution, allowing users ...

The Smart Grid Dashboard is an EirGrid Group web-based application that enables users to view and compare some of the key all island power system statistics and graphs in ...
