Italian communication base station network

Overview

This network consisted of a number of "backbone" stations covering a 6,800 km (4,200 mi) path from northern Norway to southern Turkey and was initially called the "Over the Horizon Tropospheric scatter Communications Net," but was renamed "Allied Command Europe - Highband" (ACE-High). Overview Allied Command Europe Highband, better known as ACE High, was a and The.

was established in 1949 with a supreme command (SHAPE) near , France, and the regional headquarters (RHQ) (AFNORTH) at , Norway (responsibl.

The ACE High network included the following major sites and terminals, but also connected Line of Sight (LOS) to other networks reaching C2 centres not listed here. AFNORTH.

Italian communication base station network

As per SA 5G networks, by the end of 2023 a network was realized and switched on in the main cities of Italy, namely Milan, Rome, Turin, Bologna, Naples, Florence, Verona and ...

Tropo! Part of an 8300 mi tropospheric scatter radio network for NATO command and control.

Communications equipment worth well over £1 million has been supplied and installed by Standard Telephones and Cables Limited for NATO's vast ACE HIGH communications network, which has just been completed.

The station was part of the Allied Command Europe Highband (ACE High), a NATO radiocommunication and early warning system that was operational between 1965 and ...

Abandoned NATO Cold War Radar Base, located in Italian Alps at an elevation of around 1500m, was one of the key station of this top secret communication network, the ACE High network.

After a lot of preparation I finally stood on a mountain peak in the Italian Alps, looked at the surreal antenna constructions of "Station D." and entered one of the last ...
