Jamaica Hybrid Power Plant Project

Jamaica Hybrid Power Plant Project

Jamaica's goal of achieving 50% renewables in its energy grid by 2030 has led to the procurement of 100 MW of electricity energy through the GPE. This procurement signifies a ...

Jamaica gets a fair share of sunshine and that sunshine is going to help provide power to what is said to be the largest wind- solar hybrid array in the world.

Selected developers will be required to build facilities with capacity ranging from 5 MW to 50 MW using individual or hybrid technologies - wind, solar, and hydro - with or without storage.

Jamaica's transition to adopting 50 per cent renewables is being guided by the updated Integrated Resource Plan (IRP-2), which was approved by Cabinet and published in ...

The Jamaica Public Service Company (JPS) is preparing to make a transformative \$17 billion investment in its infrastructure for the upcoming year. This bold initiative aims to modernize the nation's energy ...
