Kenya has the second most expensive electricity prices in Africa affecting household and businesses. According to Statista report, consumers in Kenya are paying approximately \$0.26 (Ksh34) per kilowatt-hour as of June 2024. This ranking places Kenya behind Cabo Verde, which has topped the list with.

Kenya Power and Lighting Company (KPLC) released the electricity tariffs for the 2023/2024 to 2025/2026 financial years. A Kenyan man charges his electric car. Photo: KPLC. The tariffs were approved by the Energy and Petroleum Regulatory Authority (EPRA), which regulates energy costs in Kenya. KPLC.

Independent Power Producers (IPPs) charged a higher cost per kWh as compared to the Kenya Electricity Generating Company PLC (KenGen) in accordance to a recent report from the Auditor-General on the Kenya Power and Lighting Company PLC for the year ending June 30, 2024. This analysis reveals.

Kenya Power has announced a significant reduction in electricity tariffs for 2024, attributing the decrease to the strengthening of the Kenyan shilling against the US dollar and a drop in fuel prices. According to the utility company, the base tariff has been reduced from Ksh19.04 per unit in 2023.

Kenya Power has raised concerns that the recent drop in electricity costs may be short-lived if a dispute with the Nairobi County Government over wayleave charges escalates. Speaking in Nairobi on Tuesday, March 4, during a meeting

with the Kenya Editors Guild, Kenya Power Managing Director Joseph.
