## Overview

What are the challenges to energy access in Liberia?

The primary challenge to energy access in Liberia is the limited and underdeveloped energy infrastructure. The lack of adequate power generation, transmission, and distribution systems contributes to this low access rate. The electrification rate is significantly lower in rural areas, where most of the population resides .

How can Liberia reduce its dependency on imported fuels?

To overcome these challenges, Liberia has been exploring alternative solutions to reduce its dependency on imported fuels for thermal power generation. One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation.

Will Liberia get a 20 MW power supply in 2020?

In addition, the government signed a Power Purchase Agreement with a solar energy company to provide the country  $\geq 20$  MW of electricity in 2020 . Despite these efforts, much work remains to be done to improve access to reliable and affordable energy in Liberia.

Do Liberians need a grid electricity system?

Only 3 % of Liberians had grid electricity access in 2019, among the lowest globally. Traditional biomass use poses indoor air pollution risks, especially for women and children. Outdated infrastructure, fuel dependence, and funding constraints hinder progress. Abundant renewables, international support, and off-grid options offer solutions.

Does Liberia's energy strategy extend beyond its borders?

The outcomes of this study, elucidating Liberia's energy dynamics and strategies, extend beyond its borders, offering pertinent recommendations for

researchers, planners, and engineers in analogous regions globally.

How can Liberia improve energy security?

One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation. By harnessing these indigenous and sustainable energy resources, Liberia can decrease its reliance on imported fuels and enhance its energy security.
