The diagram shows a vertical Energy Storage System (ESS) unit. It has a grey front panel with a central door handle and a lock mechanism. Two vertical green lines run down the center of the panel. The letters 'ESS' are printed in green in the upper right corner. At the bottom of the panel, there are two yellow warning triangles with lightning bolts inside, indicating high voltage or electrical hazard.

Overview

For a given capacity, C-rate is a measure that indicate at what current a battery is charged and discharged to reach its defined capacity.

For a given capacity, C-rate is a measure that indicate at what current a battery is charged and discharged to reach its defined capacity.

The capacity of a battery or accumulator is the amount of energy stored according to specific temperature, charge and discharge current value and time of charge or discharge. Even if there is various technologies of batteries the principle of calculation of power, capacity, current and charge and.
