Lithuania lithium energy storage power supply procurement project

Overview

What is a new energy storage project in Lithuania?

The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered by the Environmental Project Management Agency (EPMA). The deadline for applications is June 17, 2025.

Why is Lithuania launching a major energy storage procurement exercise?

Only a day before cutting ties with the Russian power grid, the Baltic state announced the launch of a major energy storage procurement exercise. Lithuania has announced a EUR 102 million (\$ 105 million) energy storage tender in a bid to procure balancing services to the transmission system operator and ensure the resilience of its grid.

Will EU grant a battery storage project in Lithuania?

Will Lithuania install 800 MWh of energy storage facilities?

In the procurement exercise, Lithuania is seeking to install at least 800 MWh of energy storage facilities, which will be directly connected to the transmission network by the end of 2028.

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

How does the EU state aid scheme work in Lithuania?

This measure implements the EUR 180 million state aid scheme approved by the European Commission in October 2024. The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered by the Environmental Project Management Agency (EPMA).

across Lithuania. The tender will be administered by the Environmental Project Management Agency (EPMA).

The money will be available to all energy storage technologies that are directly connected to the transmission network, and winning projects will be selected through a ...

Lithuania's energy ministry has announced a EUR-102-million (USD 106m) call for applications for companies to install energy storage systems aimed at providing balancing ...

Over 1.7 thousand MW of power generation capacity and more than 4 thousand MWh of storage capacity are planned to be installed in Lithuania, based on applications ...

Lithuania has announced a EUR102m (US\$106m) BESS tender to install high-power electricity storage facilities to balance the electricity system. Companies are invited to apply for ...

Over 1.7 thousand MW of power generation capacity and more than 4 thousand MWh of storage capacity are planned to be installed in Lithuania, based on applications ...

The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered by the Environmental Project ...

The money will be available to all energy storage technologies that are directly connected to the transmission network, and winning projects will be selected through a competitive bidding process. Aid will be granted ...

Lithuania's energy ministry has announced a EUR-102-million (USD 106m) call for applications for companies to install energy storage systems aimed at providing

balancing services to the transmission ...

The Lithuanian Ministry of Energy and Environment has approved additional funding for its energy storage procurement program after strong interest from potential beneficiaries.

Trina Storage, the BESS division of solar energy firm Trinasolar, has announced deployment of three new battery storage projects in Lithuania totaling 90MW/180MWh. The ...

Lithuania has announced a EUR102m (US\$106m) BESS tender to install high-power electricity storage facilities to balance the electricity system. Companies are invited to apply for support for a maximum ...

A battery energy storage system (BESS) pilot project has been commissioned in Lithuania, paving the way for a much bigger rollout of the technology scheduled to begin

Under the new call, funding will be available for high-capacity energy storage facilities with a power output of at least 15 MW and a maximum storage capacity of 300 MWh. ...

The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered ...

The Lithuanian Ministry of Energy and Environment has approved additional funding for its energy storage procurement program after strong interest from potential ...

On Tuesday, August 26th, the Lithuanian Ministry of Energy announced the completion of its major energy storage procurement, planning to deploy 1.7GW/4GWh of ...

Under the new call, funding will be available for high-capacity energy storage facilities with a power output of at least 15 MW and a maximum storage capacity of 300 MWh. ...
