# Luxembourg s solar panel share

## Overview

---

Luxembourg set a new record in its renewable energy push in 2024, with 8,000 solar panel systems installed across the country – nearly a third of all installations – driven by government subsidies and rising interest in self-sufficient energy production. How much energy does a solar PV system produce in Luxembourg?

Average 2.60kWh/day in Autumn. Average 1.22kWh/day in Winter. Average 4.63kWh/day in Spring. To maximize your solar PV system's energy output in Luxembourg, Luxembourg (Lat/Long 49.6113, 6.1294) throughout the year, you should tilt your panels at an angle of 42° South for fixed panel installations.

Is Luxembourg a good place to install solar panels?

Luxembourg ranks 72nd in the world for cumulative solar PV capacity, with 209 total MW's of solar PV installed. Each year Luxembourg is generating 330 Watts from solar PV per capita (Luxembourg ranks 10th in the world for solar PV Watts generated per capita). [ source].

What is the energy share of Luxembourg in 2023?

The data is categorized under Global Database's Luxembourg – Table LU.Eurostat: Renewable Energy: Share: by Energy Balance. LU: Renewable Energy Sources: Share: Electricity data was reported at 18.044 % in 2023. This records an increase from the previous number of 16.187 % for 2022.

Are there incentives to install solar energy in Luxembourg?

Yes, there are several incentives for businesses wanting to install solar energy in Luxembourg. The government offers a range of financial support measures, including grants and tax credits, as well as access to low-interest loans.

What is the topography of Luxembourg?

The topography around Luxembourg, Luxembourg is generally flat and low-

lying with rolling hills. The most suitable areas for large-scale solar PV would be the flat plains of the region, as well as any other open spaces that have plenty of direct sunlight throughout the day.

What is the share rate of Lu in 2023?

LU: Renewable Energy Sources: Share data was reported at 14.355 % in 2023. This records an increase from the previous number of 14.262 % for 2022. LU: Renewable Energy Sources: Share data is updated yearly, averaging 3.982 % from Dec 2004 (Median) to 2023, with 20 observations.
