# **Mongolia New Energy Storage Project**

## Overview

---

This will be one of Mongolia's largest renewable energy procurements and the country's first solar and BESS auction. The project is designed to enhance grid reliability, reduce dependence on fossil fuels and imported electricity, and deliver clean, affordable energy to remote.

This will be one of Mongolia's largest renewable energy procurements and the country's first solar and BESS auction. The project is designed to enhance grid reliability, reduce dependence on fossil fuels and imported electricity, and deliver clean, affordable energy to remote.

ULAANBAATAR, MONGOLIA (30 October 2025) — The Asian Development Bank (ADB) has been engaged by the Government of Mongolia to provide transaction advisory services for the Stable Solar Energy in Mongolia Project, which aims to develop about 115 megawatts (MW) of solar photovoltaic capacity and 65 MW.

ULAN BATOR, Oct. 31 (Xinhua) -- The Asian Development Bank (ADB) said Friday that it has been engaged by the Mongolian government to provide transaction advisory services for the Stable Solar Energy in Mongolia Project. In a statement, the ADB said it aims to develop about 115 megawatts of solar.

In the initial phase, the First Utility-Scale Energy Storage Project has been launched. In August 2022, Prime Minister L. Oyun-Erdene and representatives from the energy sector, including the Minister of Energy, participated in the foundation stone laying ceremony for the battery energy storage.

The new project aims to change that by delivering reliable, affordable, and low-carbon power to some of the nation's most remote areas. "ADB is proud to support Mongolia in advancing its clean energy transition through innovative renewable energy and storage solutions," said Shannon Cowlin, ADB.

In a significant move to bolster renewable energy infrastructure, the Asian Development Bank (ADB) has approved a grant to help Mongolia develop a 5 MW solar power project with battery storage in the Gobi Desert. This initiative

will provide reliable, renewable energy to remote areas and support.

The Asian Development Bank (ADB) has been engaged by the Government of Mongolia to provide transaction advisory services for the Stable Solar Energy in Mongolia Project, which aims to develop approximately 115 megawatts (MW) of solar photovoltaic capacity and 65 MW / 237 megawatt-hours (MWh) of.
