Namibia base station power module

Overview

What is Namibia's New Power Station?

Never miss a beat on tech, startups, and business news from across Africa with the best of journalism. Namibia's state-owned utility, NamPower, has completed the 54-megawatt (MW) Anixas II Power Station, set to be inaugurated on February 21 in Walvis Bay to enhance the country's electricity supply.

Why is NamPower launching a new power station?

NamPower stated that the new facility aims to provide reliable and dispatchable electricity to the national grid, supporting the country's energy needs and improving security of supply. The station is also expected to assist in managing the variability of renewable energy sources by providing backup generation when needed.

Why should Namibia invest in anixas II power station?

The Anixas II power station will complement Namibia's renewable energy push even as the country constructs wind farms. By investing in domestic power generation infrastructure, Namibia aims to create a more resilient energy system capable of supporting economic growth and improving the quality of life for its citizens.

Why does Namibia invest in domestic power generation infrastructure?

By investing in domestic power generation infrastructure, Namibia aims to create a more resilient energy system capable of supporting economic growth and improving the quality of life for its citizens. Never miss a beat on tech, startups, and business news from across Africa with the best of journalism.
