Namibia s energy storage power station under construction

Overview

The Sores Gaib Power Station is being built 33 km northwest of mining town Rosh Pinah in southern Namibia. The NAD 1.6 billion (\$88.4 million) project uses funding from a loan secured in September 2024 from German development bank KfW, along with NamPower's own reserves.

The Sores Gaib Power Station is being built 33 km northwest of mining town Rosh Pinah in southern Namibia. The NAD 1.6 billion (\$88.4 million) project uses funding from a loan secured in September 2024 from German development bank KfW, along with NamPower's own reserves.

State-owned utility NamPower has started construction on the 100 MW Sores Gaib Power Station in southern Namibia – its largest solar project to date. NamPower, Namibia's national power utility, has broken ground on a 100 MW solar project, its largest to date. The Sores Gaib Power Station is being.

By 2030 the Namibian government plans to increase the share of renewable energies (RE) in its electricity generation from around 30% to 70%. With a growing share of RE the need for measures to maintain and improve energy supply stability is also growing. A battery storage system such as the KfW.

On 19 June 2025, NamPower officially commenced construction of the 100 MW Sores |Gaib Solar PV Power Station, marking its largest solar power project to date. The groundbreaking ceremony took place near Rosh Pinah, approximately 33 kilometers northwest of the town. The name Sores |Gaib means "Power.

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern African region. The contract was awarded to Shandong Electrical, Engineering & Equipment Group Co.

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according to a top local official. Engineering, procurement and construction (EPC) contracts were signed today (13.

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't just a battery installation - it's a game-changer for a country where 70% of electricity was imported pre-2023 [1]. Imagine a.

Namibia s energy storage power station under construction

State-owned utility NamPower has started construction on the 100 MW Sores Gaib Power Station in southern Namibia - its largest solar project to date.

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't ...

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the ...

The national electricity utility of Namibia, NamPower has started construction of the Sores Gaib solar power station in Rosh Pinah, Namibia. The solar photovoltaic (PV) plant will ...

Namibia is set to break ground on the construction of the 100 megawatt (MW) Sores-Gaib Power Station. The construction cost of \$88 million will be 80 per cent funded by a ...

The country has taken a significant leap toward securing a stable and renewable energy future with the arrival of the first major equipment for the 51-megawatt (MW) Omburu ...

Namibia is set to break ground on the construction of the 100 megawatt (MW) Sores-Gaib Power Station. The construction cost of \$88 million will be 80 per cent funded by a concessional loan from Germany's ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and

transmission expansion is laying the foundation for a more resilient and renewable-driven ...

On 19 June 2025, NamPower officially commenced construction of the 100 MW Sores ,Gaib Solar PV Power Station, marking its largest solar power project to date. The groundbreaking ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according to a top local official.

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, ...

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern African ...

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power Pool (SAPP) can be stored in the BESS. The stored energy could supply ...

On 19 June 2025, NamPower officially commenced construction of the 100 MW Sores ,Gaib Solar PV Power Station, marking its largest solar power project to date. The groundbreaking ceremony took place near Rosh ...
