Alfen, an energy solutions specialist in Europe, is to build one of the first large scale 4-hour battery energy storage systems in the Netherlands. The company has signed an agreement with FlevoBESS for this purpose. Alfen will supply a system with a capacity of 31.6MW/126.4MWh. The energy storage. Will Alfen deliver a 4 hour battery energy storage system in the Netherlands?

Almere, the Netherlands, 28 January 2025— Alfen, an energy solutions specialist in Europe, has signed an agreement with FlevoBESS to deliver a 31.6MW/126.4MWh battery energy storage system, one of the first large scale 4-hour systems in the Netherlands.

Why does the Netherlands need energy storage?

“As the Dutch energy transition efforts accelerate, the demand for flexibility is growing also. The challenges to our electricity grid have never been greater. Without adequate energy storage, the Netherlands risks increasing grid instability and security of supply risks,” Lion Storage said in its announcement.

Where is a new energy grid located in the Netherlands?

Located near Dronten, in Flevoland, a central part of the Netherlands, the system will support the region’s ambitious energy transition goals by stabilising the grid, enabling renewable integration, and preparing for future expansions to 204MWh by 2028.

What is the biggest Bess project in the Netherlands?

As the largest BESS in the Netherlands and one of the largest energy storage projects in Europe, it sets a new standard for balancing and securing power grids. Mufasa is the largest utility-scale battery storage project in the Netherlands to be fully funded through 100% non-recourse project financing of over EUR 350 million. The closing of Project.

When will the energy storage system be operational?

The energy storage system is expected to be operational and connected to the grid in the 3rd quarter of 2025 and is also already prepared for future expansion, with a scale-up to 204MWh already being explored.
