## Overview

---

Where is Tesla's new energy storage megafactory located?

Tesla's new energy storage Megafactory in Lin-gang Special Area – a part of the China (Shanghai) Pilot Free Trade Zone – went into operation on Feb 11, with the factory's first Megapack battery system rolling off the production line.

Did Tesla ship a Megapack energy storage system to Australia?

An aerial view of the Tesla Shanghai Megafactory. [Photo/Shanghai Observer] US electric vehicle maker Tesla shipped Megapack energy storage systems from its Megafactory in Shanghai's Lin-gang Special Area to Australia on March 21, according to the company.

How many Megapack storage units will Tesla produce a year?

Up to 10,000 Megapack storage units are scheduled to be produced there annually. As Tesla's first energy storage Megafactory outside the United States, and the second of its kind for the EV maker, the Lin-gang plant only took nine months from groundbreaking, which took place in May 2024, to its official operation.

When does Tesla start building a megafactory?

Tesla began construction of the Shanghai Megafactory on May 23, 2024, its first energy storage project outside of the US. The Megafactory will begin capacity ramp-up in the first quarter and is expected to help Tesla improve its supply of energy storage products.

What energy storage products does Tesla make?

Tesla's energy storage products include the Powerwall, Powerpack and Megapack. The Shanghai Megafactory mainly produces Megapack, an ultra-large commercial energy storage battery, for the global market.

When will Tesla Shanghai megafactory start capacity ramp-up?

The Tesla Shanghai Megafactory will begin capacity ramp-up in the first quarter, according to the report. This is an important milestone for Tesla, marking the beginning of more Tesla products going from China to the world, an official from the Lingang new area said, cited by The Paper.
