New Zealand rooftop solar panel charging price

Overview

The cost of a solar panel system largely depends on the size of the system and the type of roof it's installed on. Here's a snapshot of typical residential solar system sizes in New Zealand and their approx.

How much do solar panels cost in New Zealand?

A 3kW solar power system would need ten 300W solar panels at a rough cost of \$8000 - \$10,000 in New Zealand. Conversely, a 4kW solar power system would require fourteen 290W solar panels at a ballpark figure of \$10k - \$11k installed.

How much does rooftop solar cost in New Zealand?

A unit of electricity from the grid costs, on average, 35 cents¹ compared with around 11 cents from rooftop solar (or around 6 cents if you don't need to finance that solar installation)! New Zealanders are increasingly waking up to the benefits of rooftop solar: as of August 2024, there were just over 60,000 residential solar connections.

How much does a 440w solar panel cost in New Zealand?

A single 440W solar panel in New Zealand costs around \$230. But panels are just one part of the puzzle - you'll also need an inverter, mounting gear, and professional installation to turn those panels into a fully functioning solar power system. Find out how to choose solar panels here. [Should I Wait For The Price Of Solar To Fall?](#)

.

Are solar panels a good investment in New Zealand?

Thanks to our abundance of sunshine, solar panels can often generate more electricity than your household needs. Many power providers will purchase this excess energy and pay you back in a rate per kWh. Be sure to compare the best solar buy-back rates in New Zealand so that you can get yourself the best deal.

How do solar buy-back rates work in New Zealand?

Many power providers will purchase this excess energy and pay you back in a rate per kWh. Be sure to compare the best solar buy-back rates in New Zealand so that you can get yourself the best deal. Shine on, no matter the weather, boost your property's value, and save money on your power bill by investing in solar panels and choosing solar power.

What types of solar panels are available in NZ?

Polycrystalline solar panel Polycrystalline solar panels are probably the most common type of NZ solar power panels. They are also the cheapest type of solar panel to make and therefore have one of the lowest revenue per kWh numbers in front of them. The positive side is that their low cost makes them very popular solar panels.
