New Zealand steps up energy storage research and development

Overview

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow was one of the options being explored. The Government stopped the Lake Onslow investigations in late 2023.

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow was one of the options being explored. The Government stopped the Lake Onslow investigations in late 2023.

Meridian Energy, a New Zealand state-owned energy company, has completed the development of its 100MW/200MWh 2-hour duration Ruakākā battery energy storage system (BESS), which it claims is the country's first utility-scale BESS. Construction of the BESS, located south of Whangārei, the

Construction of the Wellington, New Zealand-headquartered electricity gentailer Meridian Energy Ruakākā battery energy storage system (BESS) is now complete. The 100 MW / 200 MWh Ruakākā BESS, located in the Ruakākā Energy Park, 130 kilometres north of Auckland, has enough output to power around.

A pumped hydro scheme at Lake Onslow was one of the options being explored. The Government stopped the Lake Onslow investigations in late 2023. MBIE is

In a major step forward for New Zealand's renewable energy future, Genesis Energy has commenced construction on a 100 MW / 200 MWh Battery Energy Storage System (BESS) adjacent to the iconic Huntly Power Station. As lead designer, our strong technical expertise and agile problem-solving to design.

Ekus Energy, the battery storage platform of Macquarie's Green Investment Group (GIG), has acquired an energy storage project in New Zealand, a move that marks its entry into the country. The Maldon battery energy storage

complex in Essex, UK. Image by: Eku Energy. The energy storage specialist.

Construction of New Zealand's first large-scale grid battery storage system is now complete, with Meridian Energy's Ruakākā Battery Energy Storage System (BESS) being officially opened in a ceremony later today. The Ruakākā BESS has a maximum output of 100MW of electricity and storage capacity of.

New Zealand steps up energy storage research and development

Construction of the BESS, located south of Whangarei, the northernmost city of New Zealand, began in early 2023 and was completed within the project's original budget of NZ\$186 million (US\$109 million). It ...

Phase 1 - Feasibility Study
Phase 2 - Detailed Business Case, Final Investment Decision
Phase 3 - Implementation
Scope and decision-points
Investigation and evaluation of long-term, large-scale renewable energy storage options, including pumped hydro and a range of other dry year storage solutions. The project explores in detail the feasibility of pumped hydro at Lake Onslow, including geotechnical investigations. Cost: approxi...

In a major step forward for New Zealand's renewable energy future, Genesis Energy has commenced construction on a 100 MW / 200 MWh Battery Energy Storage System (BESS) adjacent to the iconic Huntly Power ...

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme ...

Construction of the 100 MW / 200 MWh Meridian Energy Ruakaka battery energy storage system on New Zealand's North Island is now complete.

A large-scale grid-connected battery energy storage system is to be built at Ruakaka on North Island, thought to be the first of its kind in New Zealand.

Government-backed initiatives support wind development, energy storage innovations and smart grid modernisation, ensuring a future-proof investment landscape.

Construction of the BESS, located south of Whangarei, the northernmost city of New Zealand, began in early 2023 and was completed within the project's original budget of ...

Ekus Energy, the battery storage platform of Macquarie's Green Investment Group (GIG), has acquired an energy storage project in New Zealand, a move that marks its entry ...

Construction of New Zealand's first large-scale grid battery storage system is now complete, with Meridian Energy's Ruakaka Battery Energy Storage System being officially opened in a ceremony later today.

Zealand's energy security over the short, medium, and long term. This white paper presents the key findings of that analysis, including considering a long list of solutions for flex.

Paris, January 10, 2023 - Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

Ekus Energy, the battery storage platform of Macquarie's Green Investment Group (GIG), has acquired an energy storage project in New Zealand, a move that marks its entry into the country.

Government-backed initiatives support wind development, energy storage innovations and smart grid modernisation, ensuring a future-proof investment landscape.
