

Nordic portable energy storage

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

As the Nordic countries push forward with rapid electrification and record-breaking renewable energy development, a new structural necessity is emerging in the energy system: ...

This article will introduce the top 10 energy storage companies in Sweden and explore their technological advantages and marketing strategies.

"Think of supercapacitors as the sprinters of energy storage," says Dr. Lena Fjellström, project lead at Nordic Energy Research. "They're not here to replace marathon ...

Battery energy storage systems (BESS) continue to play a vital role in the Nordic energy transition.

Battery storage systems (BESS) offer renewable energy companies, like Nordic Solar, a way to store energy from clean sources, such as solar and wind energy. While these sources can generate tons of ...

Battery Energy Storage Systems (BESS) are the perfect complement to solar energy,

which is one of the most predictable and cost-efficient renewable energy sources available. By storing ...

Battery storage systems (BESS) offer renewable energy companies, like Nordic Solar, a way to store energy from clean sources, such as solar and wind energy. While these ...

Explore the top energy storage investors in the Nordics, featuring names like Equinor and EQT Group, shaping the future of energy.

We offer high quality portabel energy with high skilled market knowhow & optimal logistic service. We are the exclusive distributor of Uniross in the Nordic region.
